NovaCloud Analytics Inc.

Portfolio Company Update | B2B SaaS – Analytics & Observability

Period: Q1 2025

NovaCloud Analytics Inc. provides cloud-native analytics and observability tools to mid-market and enterprise digital businesses across North America and Western Europe.

Key Financial & Operating Metrics

Metric	Q1 2025
Recognized Revenue (USD)	$7.9M
End-of-Period ARR	$31.6M
Gross Margin	77%
NRR (LTM)	121%
Logo Churn (LTM)	6.1%
ARR per Full-Time Employee	$234k
Cash Balance	$21.3M
Monthly Net Burn	($0.82M)
Total Headcount	135

Recognized Revenue of $7.9M in Q1 2025 reflects continued momentum in both new logo additions (13 in the quarter) and expansion. Expansion revenue of $1.7M represented 22% of total recognized revenue. ARR per full-time employee reached $234k at period end, a metric management has introduced as a capital efficiency benchmark. Infrastructure costs declined to approximately 24% of revenue.

Pipeline Summary

Pipeline Stage	Count	Total ACV	Commit ACV
Qualified	33	$9.1M	$3.8M
Proposal / Negotiation	17	$6.8M	$3.4M
Verbal Commit	5	$2.6M	$1.9M

Key Risks

• NRR improvement dependent on continued module expansion; limited new product surface area expected in H1.

• Two large enterprise deals in verbal commit as of Q4 2024 pushed to Q2; creates lumpiness risk.

• Western Europe pipeline expanding but local sales capacity remains thin.

(1) NRR (Net Revenue Retention) is equivalent to Net Dollar Retention in prior reporting periods.

(2) ARR per Full-Time Employee is a new efficiency metric introduced in Q1 2025 board reporting.

(3) Commit ACV in pipeline table reflects management's probability-weighted view; not a contractual commitment.

(4) Logo Churn is presented on a last-twelve-months (LTM) basis.
