CarbonTrack Analytics Corp.

Portfolio Update | ESG Data & Carbon Accounting Platform

Period: Q2 2025

CarbonTrack provides a cloud-native carbon accounting and Scope 1/2/3 emissions tracking platform to mid-market and enterprise corporates with ESG reporting obligations. Pricing is per-entity with data ingestion add-ons. The company primarily serves clients in North America and Western Europe.

Headline Metrics – Q2 2025

Metric	Q2 2025	Q1 2025
Contracted ARR	$16.9M	$15.2M
Recognized Revenue	$4.1M	$3.8M
Gross Margin	73%	72%
Net Revenue Retention (LTM)	121%	118%
Logo Churn (LTM)	3.8%	4.1%
Paying Entities (platform)	1,042	964
Total Headcount	78	72
Monthly Net Burn	($0.55M)	($0.61M)
Cash Balance	$13.8M	$14.8M

Platform & Data Metrics

Platform Metric	Q2 2025
Emission Records Processed (QTD)	88.4M
Connected Data Source Integrations	214
Scope 3 Value Chain Entities Tracked	28,600
Avg. Reporting Frameworks per Client	2.3
Automated Audit Trail Coverage	96%
API Data Ingestion Uptime	99.89%

Average reporting frameworks per client reached 2.3 in Q2 2025, reflecting growing multi-standard compliance needs (GHG Protocol, TCFD, CSRD, ISSB). Scope 3 value chain entity tracking grew 18% quarter-over-quarter. Net new paying entities added in Q2 2025 totalled 78, compared to 62 in Q1, driven by CSRD deadlines and CDP filing requirements.

Non-Recurring Items

• Partnership integration fee from a large accounting network: +$0.2M (one-time; excluded from ARR and recurring revenue).

• Non-cash stock-based compensation: $0.28M.

(1) Contracted ARR excludes one-time integration fees and professional services revenue.

(2) 'Paying Entities' counts each separately contracted reporting entity; group structures may consolidate multiple.

(3) Gross Margin excludes customer success and data science costs.

(4) Regulatory references (SEC, CSRD, ISSB) are for context; do not constitute legal or compliance advice.
