

NovaCloud Analytics Inc.

Portfolio Company Update | B2B SaaS – Analytics & Observability

Period: Q2 2024

NovaCloud Analytics Inc. ("NovaCloud") is a B2B SaaS platform providing cloud-based analytics and observability tools to mid-market e-commerce and digital businesses across North America and Western Europe.

Key Financial & Operating Metrics

Metric	Q2 2024
Total Billings (USD)	\$5.8M
End-of-Period ARR	\$24.1M
Gross Margin	74%
Net Dollar Retention (LTM)	115%
Logo Churn Rate (LTM)	7.8%
Cash Balance	\$29.5M
Monthly Net Burn	(\$0.98M)
Cash Runway	~30 months
Total Headcount	112

Go-to-Market & Pipeline

Stage	# Opportunities	Total Pipeline	Weighted Value
Qualified	28	\$7.4M	\$3.1M
Proposal / Negotiation	14	\$5.6M	\$2.8M
Verbal Commit	4	\$2.1M	\$1.5M

Total Billings of \$5.8M in Q2 2024 reflects the transaction-based revenue model. New logo additions in the quarter totalled 8. Expansion revenue contributed \$0.8M to Total Billings, consistent with the land-and-expand motion across mid-market accounts. Cloud infrastructure costs represented approximately 28% of Total Billings, with ongoing optimisation expected to improve this ratio through the year.

Key Risks

- Customer concentration: top 10 accounts represent ~31% of ARR.
- Competitive displacement from larger observability vendors moving down-market.
- Geographic expansion into Western Europe adding execution complexity.

(1) Total Billings includes all revenue recognized in the period under ASC 606.
(2) Net Dollar Retention and Logo Churn are presented on a last-twelve-months (LTM) basis.
(3) Monthly Net Burn reflects operating cash outflows only; excludes one-time items.
(4) Pipeline figures reflect management estimates; Weighted Value applies stage-level probability haircuts.
