End-of-Period ARR	\$29.1M
Logo Churn Rate (LTM)	6.5%
Cash Balance	\$24.0M
Monthly Net Burn	(\$0.88M)
Cash Runway	~27 months
Total Headcount	128

Performance Commentary

Net Revenue of \$7.2M in Q4 2024 represented an 11% increase over the prior quarter. Gross margin came in at 76%, a one-point improvement versus Q3, reflecting continued cloud infrastructure efficiency gains. Net dollar retention on a trailing-twelve-month basis reached 119% in Q4 2024, improving from 116% in Q3 2024, supported by strong expansion activity within existing enterprise accounts. New logo additions totalled 11. Expansion revenue of \$1.4M was the highest in the company's history to date.

Headcount of 128 at quarter-end reflects selective additions in product and infrastructure engineering. Commercial team headcount remained flat as management evaluated the go-to-market organisational structure.

Key Risks

- ARR growth increasingly driven by expansion; new logo momentum remains below target.
- Infrastructure cost efficiency gains may plateau without further architectural investment.
- Enterprise sales cycle elongation observed in Q4; average deal time up approximately 15 days.

(1) Net Revenue is equivalent to Recognized Revenue in prior periods; terminology updated for board reporting.

(2) Gross Margin and Net Dollar Retention are discussed in the commentary section; not separately tabled.

(3) Logo Churn is on a last-twelve-months (LTM) basis.
